

WEBSITE DESIGN & BUILD · HANDOVER

Maya Nature *Resort*

A new home on the web, delivered.

A complete, mobile-first website — twenty-one pages, real high-resolution photography, and one-tap WhatsApp booking — crafted to help guests fall in love with the resort before they ever arrive.

Handover v1.0

Maya Nature Resort now has a website that feels as calm, warm and premium as the place itself — **fast, effortless on a phone, and built to turn browsers into bookings.**

TO BOOK

What we set out to do

Give the resort a home online that matches its real-world hospitality: a first impression that sells the view, photography that does the property justice, and a booking path so simple it works from any phone in seconds — all without the cost, weight or lock-in of a heavy website platform.

The result

A hand-built, framework-free site that loads quickly, reads beautifully on mobile, and can be hosted almost anywhere. Every room, amenity and dish is presented with real imagery, and every page routes guests to WhatsApp to reserve.

The home page — hero, welcome, and a clear path to book.

What's included

02 · Scope

Every page a guest needs — organised, cross-linked, and consistent from the first tap to the reservation.

ON EVERY PAGE

Sticky navigation

WhatsApp concierge

Consistent footer + credit

GALLERY

99 photos, filters & lightbox

Category filters (rooms, dining, grounds, wildlife, weddings, adventure) and a full-screen lightbox with next / previous.

ROOMS

Six rooms, real photos, direct booking

Each room and cottage shown with genuine imagery, specs and a one-tap "reserve on WhatsApp".

MENU

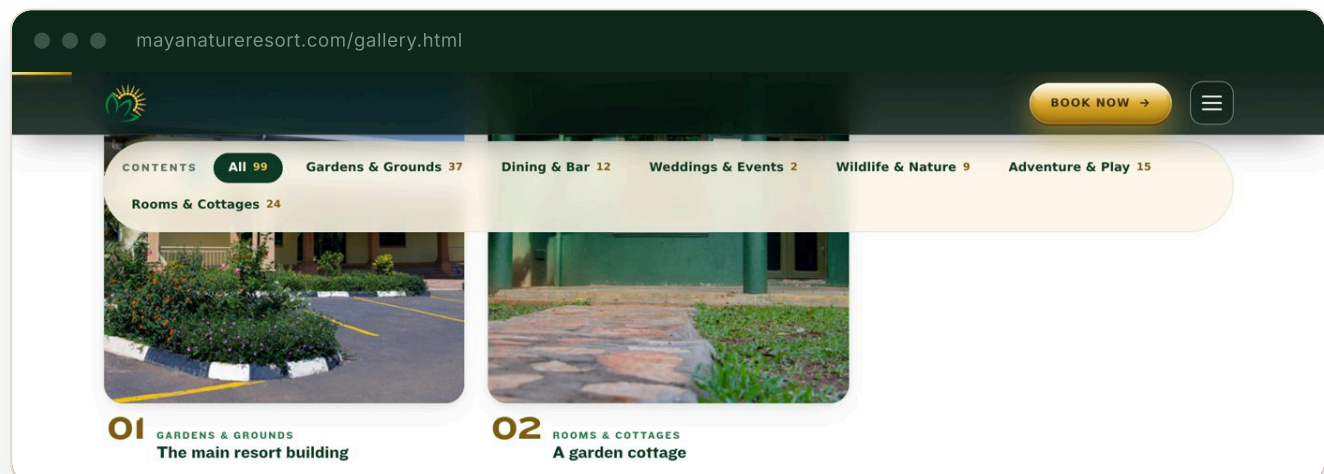

Full food & drinks menu

Structured, readable menu sections presented in the resort's style.

DIRECTIONS

Getting there, made easy

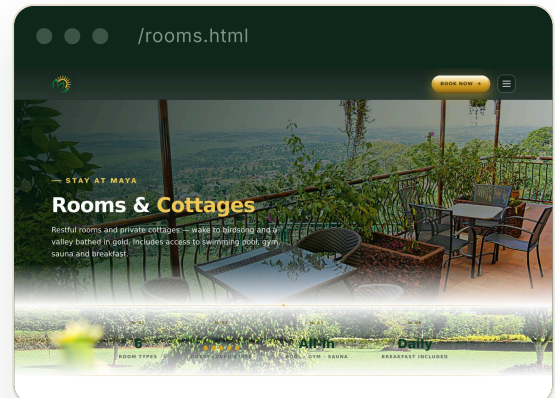

Clear road guidance and contact routes so guests never get lost on the way.

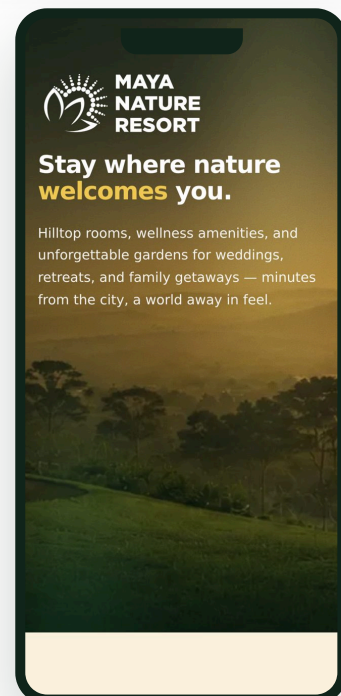

The gallery — high-resolution photography with live filtering.

Craft & approach

- ◆ **Framework-free.** Hand-written HTML, CSS & JavaScript — no WordPress, no page-builder. Faster, lighter, and free of plugin bloat, subscriptions and security churn.
- ◆ **Mobile-first & responsive.** Designed for the phone first, where most guests will visit — then scaled up to desktop. Verified with zero horizontal overflow.
- ◆ **Real photography.** The full official high-resolution photo set drives the gallery and every room card — sharp on both mobile and desktop.
- ◆ **Accessible.** Descriptive alt text, keyboard-friendly navigation and lightbox, sensible heading order and focus states.
- ◆ **SEO-ready.** Page titles, meta descriptions, Open-Graph share images, sitemap and robots — ready for Google and social sharing.
- ◆ **Performance.** Lazy-loaded imagery, self-hosted fonts and optimised assets keep pages quick to load.

Rooms & Cottages — desktop.

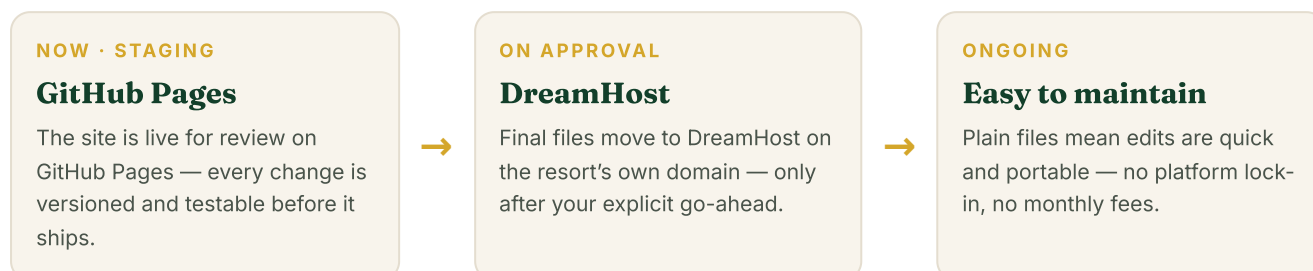

The same site, effortless on a phone.

Hosting & handover

04 • Handover

Hosting & going live

A few things to keep in mind

- ◆ **Content is easy to update.** Text and images live in clearly-named files; new photos drop straight into the gallery and room cards.
- ◆ **Bookings go to WhatsApp** (+256 773 883 760) — no booking fees, no third-party commissions.

Owner to-do (optional polish)

- ☐ Confirm the DreamHost go-live
- ☐ Share a photo of the real gym (optional swap)
- ☐ Provide the TikTok handle & exact gate GPS pin
